## SEMO Instructor Discusses Post-Flood Soil

CAPE GIRARDEAU, Mo, - A professor and area agriculture expert at Southeast Missouri State University has delivered a lecture concerning the possible damage to the land in the Birds Point New Madrid Floodway.

Dr. Michael Aide, chair of the Department of Agriculture at Southeast Missouri State University, presented a special lecture on soil damage likely to occur to farms and agriculture in the Missouri Bootheel as a result of the breaching of the New Madrid spillway. The lecture was presented in an AO215 “Soils” class.

Aide presented the lecture at the request of students and transmitted via interactive television to Southeast’s regional campuses.

The 45-minute lecture is now available online from Southeast. Those interested in this recorded video may connect from any PC From any PC with a high speed connection. A spokesman for the University says the link should open Windows Media Player and play the video.
