Pat Turman Experiences Hometown Healing

Dr. Phan took so much time with me!

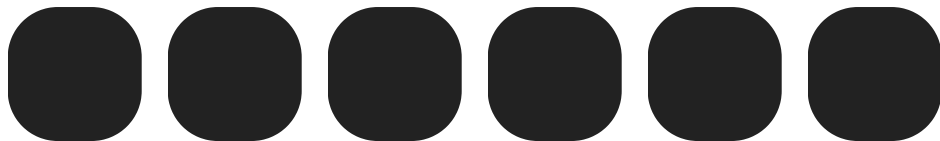

When Patricia Turman took some time off from work to take care of her daughter following her knee surgery, she didn't expect to find herself needing surgery too! "I had been experiencing pain on my right side for about a week. I tried to ignore it, but it continued to get worse. I finally gave in and went to the ER, expecting to find out something minor was wrong. It was far from minor. My appendix had ruptured and abscessed. I needed to have surgery right away. Originally, I wanted to go somewhere else, but decided to stay here because everyone made me feel so at ease. The surgeon, Dr. Ly Phan, met with me and explained everything clearly. He was so thorough and took so much time with me. The surgery nurse, Regena Moses, made me feel comfortable. I was so scared and she could tell. Her reassurance was priceless. I feel blessed to have been cared for so well, right here in town. It was also so convenient for my family to visit me and care for our daughter too."

At Missouri Southern Healthcare, we know the importance of choosing the right place for surgery. Not only will you receive the best medical care, but also the attention and respect you and your family deserve. Choose Missouri Southern Healthcare.
