Don't Become a New Year's Eve Statistic

Don't Become a New Year's Eve Statistic

Missouri - There are no excuses for driving drunk. The consequences are known: fines, jail time or even death.

As you prepare for your New Year's Eve, top your list with a designated driver. The Missouri Department of Transportation wants to remind those who plan to drink alcohol to designate a sober driver or call a cab.

Statewide, law enforcement is on the lookout for impaired drivers. Many municipalities will be shoring up their patrols with a focus on intoxicated drivers.

"Don't become a New Year's Eve statistic," said Dave Nichols, MoDOT director. "Last

year, 12 people were killed and 63 were seriously injured in Missouri traffic crashes over the New Year's holiday."

Nichols noted that four of the fatalities and 11 of the serious injuries involved a substance-impaired driver.

"We are making a special effort to reach motorists with reminders to plan ahead if they're going to drink tonight," Nichols said. "This is a time of celebration, but it's also a time to use forethought and common sense."

Light snow is also forecasted for many parts of the state over the next 24 hours, adding to the need for caution when operating a vehicle.

SANTA Has Been Spotted!

SANTA Has Been Spotted!

*Written by
Dee Loflin, SMT Manager/Editor*

Dexter, Missouri – Santa has been spotted by NORAD! Did you know that children all over the United States can track Santa Clause? The North American Aerospace Defense Command (NORAD) is set to start tracking St. Nick's travels tonight.

You can head over to **NoradSanta.org** to see the countdown clock ticking down to that final hour. NORAD has been tracking Santa via its high-tech instruments since 1955 with its festive annual program designed to show children how the red-suited, jolly fellow makes his way to chimneys all over the world.

Children can explore the North Pole and see Santa's Village. There are games, movies and music to keep the children entertained for hours as they wait for Santa.

How did all this get started? Go to the Secret Santa Files and learn how Sears Roebuck & Co. misprinted a telephone number for children to call Santa. The phone number put kids through to the CONAD Commander-in-Chief's operations "hotline". OOPS! Not to disappoint all the children, the Director had his staff check the radar for Santa and so it became tradition. CONAD was later renamed to NORAD.

Satellites help track Rudolph's red nose with no problem. The satellites are only 22,300 miles above the earth each with infrared sensors searching for heat. Rudolph's red nose sure puts off some heat with that GLOW!

NORAD intelligence even posts videos almost every hour on Christmas Eve of Santa making his way around the world. There is even specific technical data about Santa's sleight. Did you know it is 75 candy canes long and 40 candy canes wide? Or that the maximum speed is faster than starlight? Or that the fuel consists of hay, oats and carrots to keep his nine reindeer in tiptop shape? There is so much to learn at **NoradSanta.org**. Go check it out this holiday season.

HO! HO! HO! Merry Christmas to all!

...HEAVY RAIN LIKELY LATE FRIDAY THROUGH EARLY SUNDAY...FLOODING POSSIBLE...
