Wind Damage Possible in Southeast Missouri Thursday

FEBRUARY 19TH 2014 BY JEFF HUFFMAN

Wind Damage Possible in Southeast Missouri Thursday

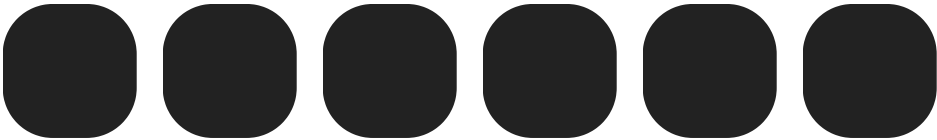

A developing line of thunderstorms capable of producing damaging wind will race across eastern Missouri Thursday afternoon ahead of a cold front. The severe risk, including isolated tornadoes, is much higher as this line reaches Tennessee, Kentucky, Southern Illinois and Indiana. However, wind gusts of 40 to 60 mph will be common with the squall line as it passes through Southeast Missouri between 4 and 7pm Thursday.

Estimated arrival times are 4 to 5pm in Poplar Bluff, close to 5pm in Dexter, and between 5 and 6pm in Sikeston. When the skies threaten, residents and motorists in Stoddard County are encouraged to seek shelter indoors, preferably away from windows, trees and power lines.

Stoddard County, Missouri - The National Weather Service in Paducah, Kentucky has issued a Special Weather Statement for Stoddard County

... TRAVEL PROBLEMS LIKELY OVER MUCH OF THE AREA TONIGHT...

GUSTY NORTHWEST WINDS WILL BRING MUCH COLDER AIR ACROSS THE REGION TONIGHT. AS TEMPERATURES FALL BELOW FREEZING FROM NORTHWEST TO SOUTHEAST LATE THIS AFTERNOON AND THIS EVENING... BLACK ICE WILL FORM WHERE MOISTURE REMAINS ON AREA ROADS. TEMPERATURES BY DAYBREAK SATURDAY WILL GENERALLY RANGE FROM 10 TO 20 DEGREES... WHICH MAY MAKE IT DIFFICULT TO TREAT THE ROADS. IN ADDITION... SOME AT LEAST PATCHY LIGHT FREEZING DRIZZLE IS EXPECTED THROUGH THE EARLY EVENING... WHICH COULD LEAD TO SOME MINOR ICING OF ELEVATED SURFACES. MOTORISTS TONIGHT AND EARLY SATURDAY ARE ENCOURAGED TO EXERCISE EXTREME CAUTION. ANY ROAD SURFACE THAT APPEARS TO BE WET WILL LIKELY BE SLICK AND HAZARDOUS.

Winter Weather Statement Issued for Stoddard County

Stoddard County, Missouri - The National Weather Service in Paducah, Kentucky has issued a Winter Weather Statement for Stoddard County.

.. HAZARDOUS TRAVEL CONDITIONS EXPECTED THROUGH THE MORNING... IN THE WAKE OF THE STORM SYSTEM THAT BROUGHT A MIX OF FREEZING RAIN... SLEET... AND SNOW TO THE REGION ON TUESDAY... AREA ROADWAYS RANGE FROM SNOW AND ICE COVERED IN NORTHERN PORTIONS OF THE QUAD STATE REGION TO WET IN SOUTHERN SECTIONS.

AS TEMPERATURES FALL INTO THE 20S THIS MORNING... BLACK ICE MAY FORM ON THE ROADWAYS THAT ARE WET... ESPECIALLY ON BRIDGES AND OVERPASSES. IN ADDITION... INTERMITTENT LIGHT SNOW SHOWERS ARE POSSIBLE THROUGH THE MORNING. THESE MAY BE INTENSE ENOUGH AT TIMES TO REDUCE VISIBILITY AND MAKE CONDITIONS SLIPPERY EVEN ON THOROUGHFARES THAT HAVE ALREADY BEEN CLEARED.

IN LOCATIONS THAT RECEIVED FREEZING RAIN... SIGNIFICANT ICING OF TREES AND POWER LINES HAS ALREADY RESULTED IN NUMEROUS... BUT RELATIVELY CONCENTRATED... POWER OUTAGES. AS NORTHWEST WINDS INCREASE TO 10 TO 15 MPH EARLY THIS MORNING... IT MAY RESULT IN AN INCREASED CHANCE OF MORE SIGNIFICANT POWER OUTAGES.

IF YOU ARE IN AN AREA THAT RECEIVED SIGNIFICANT ICING... KEEP AN EXTRA VIGILANCE AS TO WHAT IS ABOVE YOU IN CASE TREE BRANCHES AND LIMBS BREAK. ALSO IF YOU MUST TRAVEL THIS MORNING... GIVE YOURSELF EXTRA TIME TO REACH YOUR DESTINATION. BE ESPECIALLY CAREFUL WHEN CROSSING BRIDGES... OVERPASSES... AND AT INTERSECTIONS.
