# Gov. Jay Nixon Declares State of Emergency in Missouri

DECEMBER 27TH 2015 BY DEE LOFLIN

[Gov. Jay Nixon Declares State of Emergency in Missouri](#)

**Missouri** - Gov. Jay Nixon today declared a state of emergency in Missouri as heavy rain, flooding and flash flooding continue to impact much of the state.

Heavy rains have led to widespread flooding and at least eight fatalities have been reported. More heavy rain and additional flooding is expected through Monday, and river levels are forecast to continue to rise over the next several days.

Since the latest round of severe weather began, the Missouri State Highway Patrol has conducted dozens of water rescues, and assisted in the evacuation of residents from flooded areas. Multiple roadways have been closed due to floods and the Governor urged Missourians in flood-affected areas to avoid travel if possible.

“Widespread flooding and continued rainfall are causing very dangerous conditions across much of central and southern Missouri,” said Gov. Nixon. “Multiple fatalities due to flash flooding have already been reported, and I urge Missourians in flood-affected areas to stay alert, avoid travel if possible and never drive into a flooded roadway. With more heavy rain expected tonight and tomorrow, state emergency management personnel will be working around the clock to keep Missourians safe.”

The Governor also urged residents to use caution in northern Missouri, where snow and freezing rain are expected as temperatures drop and wind gusts increase.

The State Emergency Operations Center has been actively monitoring the storm system, and Gov. Nixon has been receiving updates from his emergency management team to assess the current weather situation and address local needs. The team includes senior officials from the Missouri Department of Public Safety, Missouri National Guard, Missouri State Highway Patrol and the State Emergency Management Agency. The Missouri State Emergency Operations Plan also has been activated, allowing state agencies to coordinate directly with local jurisdictions to provide emergency services.

The Governor urged residents of flood-affected areas of Missouri to pay close attention to weather warnings and follow the safety instructions of local officials as the potential for additional dangerous flooding continues. Missourians, especially motorists, are encouraged to remember these important safety tips on flooding and high water:

- Do not walk through moving water. Six inches of moving water can make you fall. If you have to walk in water, walk where the water is not moving. Use a stick to check the firmness of the ground in front of you.
- Do not drive into flooded areas. If floodwaters rise around your car, abandon the car and move to higher ground if you can do so safely. You and the vehicle can be quickly swept away. Six inches of water will reach the bottom of most passenger cars, causing loss of control and possible stalling.
- A foot of water will float many vehicles. Two feet of rushing water can carry away most vehicles, including sport utility vehicles and pick-ups. Even if the water appears shallow enough to cross, don't try it. Water hides dips in the road. Worse yet, there may be no road at all under the water. Flooding can scour away the entire road surface and a significant amount of ground beneath.

Missourians who need disaster information, shelter information, and referrals are urged to call 211. The 211 service is now available throughout Missouri.

## NORAD Tracks Santa for the 60th Year

---

DECEMBER 24TH 2015 BY DEE LOFLIN

[NORAD Tracks Santa for the 60th Year](#)

Peterson Air Force Base, Colorado - For the sixth consecutive year and marking the 60th Anniversary of NORAD tracks Santa, First Lady Michelle Obama took time from her holiday schedule to deliver cheer to children across America by personally answering phone calls on Santa's journey as part of the annual NORAD Tracks Santa program run by the North American Aerospace Defense Command.

Mrs. Obama fielded calls from Hawaii to surprised children calling in to the NORAD Tracks Santa Operations Center. Mrs. Obama answered children's questions about Santa's exact location using NORAD's global Santa Tracker and let the children know when to expect Santa to visit their homes. She assured them all that NORAD was tracking Santa's progress closely, and his journey was going well. A photo of Mrs. Obama taking calls is available at [Http://bit.ly/1mhPH9y](http://bit.ly/1mhPH9y)

The NORAD Tracks Santa program began in 1955 after a phone call was made to the Continental Air Defense Command Operations Center in Colorado Springs, Colo. The call was from a local youngster who dialed a misprinted telephone number in a local newspaper advertisement. The commander on duty who answered the phone that night gave the child the information requested - the whereabouts of Santa.

This began the tradition of tracking Santa, a tradition that was carried on by NORAD when it was formed in 1958.

The NORAD Tracks Santa program has grown immensely since first presented on the Internet in 1997. The website, [www.noradsanta.org](http://www.noradsanta.org) receives millions of unique visitors from hundreds of countries and territories around the world. In addition, a live Operations Center is occupied for 23 hours with more than 1,200 volunteers each year who receive hundreds of thousands of phone calls and emails from families around the world.

## Bootheel Recycling Price Sheet - December 17, 2015

DECEMBER 18TH 2015 BY DEE LOFLIN

Bootheel Recycling Price Sheet - December 17, 2015

**Dexter, Missouri** - "Bootheel Recycling is a Missouri scrap metal recycling company whose customer base includes regional utility companies, large manufacturing businesses, tool and die shops, local Dexter scrap dealers, haulers, farmers and individuals across Southeast Missouri and Arkansas."

"We comply vigilantly with the laws set forth by OSHA, EPA, federal and Missouri. Our scrap metal recycling policies are honest and transparent. Our scales are certified yearly and calibrated twice a year. We belong to the Chamber of Commerce and the Institute of Scrap Recycling Industries. We are OSHA 10 certified. We have the highest graded material in the industry."

"We buy most forms of ferrous and non-ferrous metals, including copper, aluminum, stainless steel, brass, scrap iron, radiators and catalytic converters. Please consult our Scrap Metal Selling Guide to find out more about how to sell scrap metal, and how to get the most money for your scrap metal. The best indication of our success is our loyal customer base. We are nice people with good business practices. We have a very high level of return business, and our new customers often come to us by way of referral."

"Our friendly customer service staff will ensure that your recycling experience is simple and hassle-free. Our modern and streamlined processing system allows us to offer

competitive prices. Please contact us today if you would like to inquire about our services."

Check out their website by clicking **HERE**.
