MDC Waterfowl Hunting Reservations Open September 1, 2018

AUGUST 10TH 2018 BY DEE LOFLIN

MDC Waterfowl Hunting Reservations Open September 1, 2018

MDC waterfowl hunting reservations open Sept. 1
Apply online Sept. 1 – 18 to hunt waterfowl on 12 MDC managed wetland areas.

Jefferson City, Missouri - The Missouri Department of Conservation (MDC) reminds waterfowl hunters they have from Sept. 1 through Sept. 18 to apply online with MDC to hunt on 12 wetland areas intensively managed by the Department for waterfowl.

For more information and to apply starting Sept. 1, go to mdc.mo.gov and search “Waterfowl Reservations,” or apply directly at short.mdc.mo.gov/Z4W.

The reservation system allocates half of the available hunting opportunities on these areas for Missouri residents chosen through a random drawing. The other half are for walk-in hunters who draw on-site each morning for the remaining spots.

MDC reminds hunters that waterfowl hunting in Missouri is influenced by habitat conditions, weather, and the timing of migrations more than overall duck and goose numbers.

Get more information on related regulations, seasons, species, permits, limits, and more from MDC’s “Migratory Bird and Waterfowl Hunting Digest 2018-2019,” available where hunting permits are sold.

Get hunting details by species from the MDC website at huntfish.mdc.mo.gov/.

Buy hunting permits from numerous vendors around the state, online at mdc.mo.gov/buypermits, or through MDC’s free MO Hunting mobile app, available for download through Google Play for Android devices or the App Store for Apple devices.

Potential Changes for Crappie Fishing At Wappapello Lake

AUGUST 07TH 2018 BY DEE LOFLIN

Potential Changes for Crappie Fishing At Wappapello Lake

MDC seeks public input on possible regulation change for crappie fishing at Wappapello Lake
Potential regulation change will increase the opportunity for anglers to harvest fish.

Wappapello, Missouri - The Missouri Department of Conservation (MDC) is seeking public input on a possible regulation change for crappie fishing at Wappapello Lake in Wayne County to both allow anglers to keep more crappie and promote more consistency in the quality of the fishery. Wappapello Lake is a popular fishing location in Southeast Missouri. According to MDC, crappie are the most popular fish sought by anglers fishing the lake.

Under the existing MDC regulation, anglers may harvest a daily limit of 30 white and black crappie combined with a minimum length of 9 inches. Under the proposed regulation change, there will be no minimum length limit for crappie. The daily limit will remain at 30 crappie, but not more than 15 of those fish could be above 9 inches.

“Only about two percent of the black crappie in Wappapello ever reach nine inches,” explained MDC Fisheries Management Biologist Dave Knuth. “Therefore, not many black crappie get harvested by anglers with the current regulation.”

The proposed regulation change would allow anglers to harvest more of the slow growing black crappie, while preventing overharvest of white crappie.

“I hope to see a lot of the anglers at these upcoming meetings and have the opportunity to visit with them about this proposed change,” Knuth said.

MDC will hold two public meetings focusing on the proposed regulation change for Wappapello Lake:

Sept. 17, 6 to 8 p.m. at New Home General Baptist Church, 1864 Hwy AA, Poplar Bluff, MO 63901.

Sept. 18, 6 to 8 p.m. at Greenville Elementary Gymnasium, 195 Walnut St., Greenville, MO 63944

MDC invites public comment on the proposed regulation change online at [**www.mdc.mo.gov/CrappieComments**](http://www.mdc.mo.gov/CrappieComments).

Fishing regulations can vary between waters so anglers should check regulations for the specific waters they are fishing. For more information about fishing in Missouri, visit [**https://huntfish.mdc.mo.gov/fishing**](https://huntfish.mdc.mo.gov/fishing).

MO Dept of Conservation Offers Federal Duck Stamps Online Only

AUGUST 02ND 2018 BY DEE LOFLIN

MO Dept of Conservation Offers Federal Duck Stamps Online Only

MDC now only offers Federal Duck Stamps online

MDC offices no longer sell physical Federal Duck Stamps. Buy them online at www.mdc.mo.gov/buypermits.

Missouri - Due to declining sales of physical Federal Duck Stamps at its offices where hunting permits are sold, the Missouri Department of Conservation (MDC) will no longer sell physical stamps at its offices.

Waterfowl hunters can still buy Federal Duck Stamps electronically through MDC's online permit website at mdc.mo.gov/buypermits or through its mobile app MO Hunting. For MO Hunting users, Federal Duck Stamps bought through MDC's website or the app will appear on the app. Learn more about MO Hunting at <https://bit.ly/2LsOCJg>.

When you buy an electronic Federal Duck Stamp, it is valid as a Federal Duck Stamp for 45 days from the date of purchase. Within that time, a physical Duck Stamp will be mailed to you. If you purchase the Federal Duck Stamp electronically from MDC, the stamp will show up on the MO Hunting app or can be printed immediately after purchasing. After 45 days, you must carry your current, signed Federal Duck Stamp while hunting.

According to MDC, out of the 33,300 duck stamps sold through the Department last year, only around 500 were bought at MDC offices, or about 1.5 percent. The rest were purchased online.

Waterfowl hunters can still purchase physical Federal Duck stamps at select U.S Postal Service locations. For more information, visit usps.com, call 800-782-6724, or contact a local post office.

For more information on the Federal Duck Stamp program, go online to fws.gov/birds/get-involved/duck-stamp.php.

7 New Counties Added to CWD Mandatory Testing

JUNE 29TH 2018 BY DEE LOFLIN

7 New Counties Added to CWD Mandatory Testing

MDC sets CWD sampling efforts for deer season

Find more information at mdc.mo.gov/cwd and in MDC's "2018 Fall Deer & Turkey Hunting Regulations and Information" booklet, available starting in July where permits are sold.

Missouri - The Missouri Conservation Commission recently approved recommendations by the Missouri Department of Conservation (MDC) for its fall and winter efforts to find cases of chronic wasting disease (CWD) and help limit the spread of the deadly deer disease to more deer and more areas.

MDC confirmed 33 new cases of CWD following the testing of nearly 24,500 free-ranging Missouri deer through its sampling and testing efforts last season. The new cases were found in Adair, Cedar, Franklin, Jefferson, Linn, Macon, Perry, Polk, St. Clair, and Ste. Genevieve counties. These new cases bring the total number of free-ranging deer in Missouri confirmed to have CWD to 75. Learn more at mdc.mo.gov/cwd under "CWD in Missouri."

NEW COUNTIES ADDED TO CWD MANAGEMENT ZONE

Based on the findings from the past season, MDC has added seven new counties to its CWD Management Zone: Bollinger, Cape Girardeau, Grundy, Madison, McDonald, Mercer, and Perry.

These seven new counties join 41 existing counties of the Department's CWD Management Zone. The Zone consists of counties in or near where cases of the disease

have been found. Mercer County was added because of the proximity of a CWD-positive deer found in southern Iowa. McDonald County was added because of CWD detection in northwest Arkansas.

The 48 counties are: Adair, Barry, Benton, Bollinger, Boone, Callaway, Cape Girardeau, Carroll, Cedar, Chariton, Cole, Cooper, Crawford, Dade, Franklin, Gasconade, Grundy, Hickory, Jefferson, Knox, Linn, Livingston, Macon, Madison, McDonald, Mercer, Miller, Moniteau, Morgan, Osage, Ozark, Perry, Polk, Putnam, Randolph, Schuyler, Scotland, Shelby, St. Charles, St. Clair, St. Francois, Ste. Genevieve, St. Louis, Stone, Sullivan, Taney, Warren, and Washington.

MDC has increased the availability of antlerless permits in the seven new counties and expanded the firearms antlerless portion to help harvest more deer in the counties and limit the spread of the disease.

MDC has also removed the antler-point restriction for Grundy and Mercer counties, which are included in the Zone.

To help limit the possible spread of CWD, MDC encourages hunters to process deer as close as possible to where harvested and to properly dispose of carcass parts by leaving or burying parts on site, or bagging parts and placing them in trash containers.

NEW COUNTIES PART OF DEER FEEDING BAN

The seven new counties added to the CWD Management Zone are also now included in MDC's ban on feeding deer and providing mineral supplements, effective July 1.

According to the Wildlife Code of Missouri, the placement of grain, salt products, minerals, and other consumable natural and manufactured products used to attract deer is prohibited year-round within counties of the CWD Management Zone. Exceptions are feed placed within 100 feet of any residence or occupied building, feed placed in such a manner to reasonably exclude access by deer, and feed and minerals present solely as a result of normal agricultural or forest management, or crop and wildlife food production practices.

The feeding ban does not apply to food plots or other agricultural practices.

MANDATORY CWD SAMPLING

MDC will require hunters who harvest deer in 31 counties of its CWD Management Zone during the opening weekend of firearms deer season, Nov. 10 and 11, to present their deer – or the head with at least six inches of neck attached -- for CWD sampling at one of 61 sampling stations throughout the counties.

The 31 counties include those where CWD has previously been detected, those within approximately five miles of a positive, select counties along the Missouri-Arkansas border near where cases of CWD have been found in Arkansas, and the seven counties added to the CWD Management Zone.

The 31 counties for mandatory sampling are: Adair, Barry, Bollinger, Cape Girardeau, Cedar, Cole, Crawford, Franklin, Grundy, Hickory, Jefferson, Knox, Linn, Macon, Madison, McDonald, Mercer, Moniteau, Ozark, Perry, Polk, Putnam, St. Charles, St. Clair, St. Francois, Ste. Genevieve, Stone, Sullivan, Taney, Warren, and Washington.

MDC asks hunters to field dress and Telecheck their deer before taking them to a CWD sampling station.

“MDC is trying to limit the spread of CWD in Missouri by finding cases and slowing the spread to more deer and more areas,” said MDC Cervid Program Supervisor Barbara Keller. “Mandatory sampling is a powerful surveillance tool we use to monitor the levels of CWD in areas known to have the disease, but more importantly, to detect any ‘sparks’ or new areas of infection so we can begin managing for the disease in those areas without delay. With 75 confirmed cases of CWD in wild deer since 2012, the disease is still relatively rare in the state and we want to keep it that way.”

VOLUNTARY CWD SAMPLING

MDC will again offer voluntary CWD sampling for deer harvested in any of the 48 counties of the CWD Management Zone during the entire deer season from Sept. 15 through Jan. 15, 2019. Get more information on MDC’s voluntary sampling efforts, including locations, later this summer at mdc.mo.gov/cwd under “Voluntary Sampling.”

MDC asks hunters to field dress and Telecheck their deer before taking them to a CWD sampling station. Hunters can get test results for their CWD-sampled deer online at mdc.mo.gov/CWDTTestResults.

There have been no cases of CWD infecting people, but the Centers for Disease Control and Prevention (CDC) strongly recommends having deer tested for CWD if harvested in

an area known to have cases of the disease. The CDC also recommends not eating meat from animals that test positive for CWD.

ADDITIONAL EFFORTS

MDC will again contact landowners of five acres or more in areas very near to where multiple infected deer have been found to offer no-cost “CWD Management Seals” to further reduce deer numbers and help limit the spread of the disease.

MDC will again also work with landowners on a voluntary basis to harvest more deer in immediate areas where CWD has been found through post-season targeted culling. These efforts help limit the spread of the disease by removing more infected deer from the areas.

MORE INFORMATION

The Missouri Conservation Commission also recently approved several recommendations by MDC for the upcoming deer hunting season.

Growing deer numbers led MDC to allow unlimited archery antlerless permits in Butler, Iron, and Reynolds counties and to include Howell County in the antlerless portion of the fall firearms season.

Lower deer numbers and recent harvest totals led MDC to remove Andrew, Atchison, Holt, and Nodaway counties from the antlerless portion of the firearms season.

Find more information on the upcoming deer season in MDC’s “2018 Fall Deer & Turkey Hunting Regulations and Information” booklet, available starting in July where permits are sold.

Frogging Begins June 30th at Sunset

JUNE 29TH 2018 BY DEE LOFLIN

Frogging Begins June 30th at Sunset

Discover nature through frogging starting June 30

Bullfrogs and green frogs are legal game with a daily limit of eight.

The Missouri Department of Conservation (MDC) encourages Missourians to discover nature this summer. One fun and exciting way is through frogging. Frogging season begins June 30 at sunset and ends Oct. 31. Missouri has two frog species that are legal game — bullfrog and green frog. Bullfrogs are larger and therefore more sought-after.

The daily limit is eight frogs of both species combined and the possession limit is 16 frogs of both species combined. Only the daily limit may be possessed on waters and banks of waters where hunting.

Daily limits end at midnight so froggers who catch their daily limits before midnight and then want to return for more frogging after midnight must remove the daily limit of previously caught frogs from the waters or banks before returning for more.

Frogging can be done with either a fishing permit or a small-game hunting permit. Children under the age of 16 and Missouri residents 65 years of age or older are not required to have a permit.

Those with a fishing permit may take frogs by hand, hand net, atlatl, gig, bow, trotline, throw line, limb line, bank line, jug line, snagging, snaring, grabbing or pole and line.

With a small game hunting permit, frogs may be harvested using a .22-caliber or smaller rimfire rifle or pistol, pellet gun, atlatl, bow, crossbow, or by hand or hand net. The use of artificial light is permitted when frogging.
