Winter Storm Watch Issued for Stoddard County Beginning Wednesday

JANUARY 31ST 2022 BY DEE LOFLIN

Winter Storm Watch Issued for Stoddard County Beginning Wednesday

Stoddard County, MO - The National Weather Service in Paducah, KY has issued a WINTER STORM WATCH from Wednesday evening through late Thursday night.

DESCRIPTION

...WINTER STORM WATCH IN EFFECT FROM WEDNESDAY EVENING THROUGH LATE THURSDAY NIGHT...

WHAT...Heavy mixed precipitation is possible with total snow accumulations of up to two inches, and ice accumulations of two tenths to four tenths of an inch possible.

WHERE...For portions of southeast Missouri and southern Illinois. This area is along and west of a line from Doniphan, Poplar Bluff, Cape Girardeau Missouri onward to Carbondale, McLeansboro, and Wayne City Illinois.

WHEN...From Wednesday evening through late Thursday night.

IMPACTS...Power outages and tree damage are likely due to the ice. Travel could be nearly impossible and should be avoided unless absolutely necessary. The hazardous conditions could impact those travelers during the morning or evening commutes.

ADDITIONAL DETAILS...Prolonged power outages may occur where significant ice accumulations develop.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

Monitor the latest forecasts for updates on this situation.

Special Weather Statement Issued for Stoddard County Tonight and Early Wednesday

JANUARY 25TH 2022 BY DEE LOFLIN

Special Weather Statement Issued for Stoddard County Tonight and Early Wednesday

Stoddard County, MO - The National Weather Service in Paducah, Kentucky has issued a Special Weather Statement. Wind chills near zero tonight (Tuesday) and early Wednesday.

Description

...Wind Chills Near Zero Late Tonight and Early Wednesday...

Arctic high pressure will bring another shot of bitterly cold air into our region over the next 24 hours. Temperatures tonight will bottom out from 5 to 15 degrees, but north winds around 10 mph will make it feel even colder.

Around daybreak Wednesday, wind chills will be from zero to 5 below along and northwest of a line from Evansville Indiana to Cape Girardeau Missouri. Wind chills to the southeast of that line will bottom out from zero to 5 above.

Regardless of the exact value, these wind chills will impact morning commuters and school children. Dress in layers, wear a hat or hood, and protect outdoor pets. The lowest wind chills will occur from about 3 AM to 10 AM, then rise into the 20s Wednesday afternoon.

Special Weather Statement Issued - Bitter Cold Temps and Slippery Roads Beginning Wednesday

JANUARY 18TH 2022 BY DEE LOFLIN

Special Weather Statement Issued - Bitter Cold Temps and Slippery Roads Beginning Wednesday

Stoddard County, MO - The National Weather Service in Paducah, Kentucky has issued a Special Weather Statement for Wednesday afternoon and evening. Bitter cold and slick road!

Description

...Bitterly cold temperatures expected starting Wednesday Afternoon... ...Slick Roads possible late Wednesday Afternoon and Night...

An Arctic blast of cold air will move into the Quad State region Wednesday afternoon, pushing the entire region below the freezing mark by 7 pm Wednesday. Once the cold air moves in, temperatures are not expected to rise above freezing until early Saturday afternoon.

Gusty north winds will produce very low wind chills Thursday into Friday morning. Wind chills below zero will be likely over southern Illinois and southeast Missouri, with barely above zero wind chills over west Kentucky and southwest Indiana. Wind Chills will remain in the single digits for parts of the area all day on Thursday and into early Friday morning.

Anyone traveling or working outdoors should bundle up in layers to protect yourself from developing hypothermia and frostbite.

Consideration should also be given to protect pets and livestock left outdoors.

For those with water systems vulnerable to an extended period of sub-freezing temperatures, be sure to keep a trickle of water running through those systems.

A Winter Weather Advisory is currently posted for part of southwest Indiana and the Pennyriple region of west Kentucky late Wednesday afternoon and night, where the best accumulation of wintry precipitation is expected.

However, with temperatures expected to plummet and remain below freezing, any wintry precipitation still left on roadways and sidewalks across the Quad State late Wednesday afternoon and night will freeze.

Travelers should use caution while traveling and be watchful for any slick spots on roadways, especially elevated bridges and overpasses.

Please stay tuned to the National Weather Service in Paducah for the latest forecasts and statements associated with this winter event.

Special Weather Statement for Stoddard County

JANUARY 14TH 2022 BY DEE LOFLIN

Special Weather Statement for Stoddard County

Stoddard County, MO - The National Weather Service in Paducah, KY has issued a Special Weather Statement for Stoddard County, MO.

Description

...WINTER WEATHER SYSTEM TO AFFECT THE AREA TONIGHT THROUGH SUNDAY...

We continue to monitor a winter weather system forecast to affect the area tonight through Sunday. Considerable uncertainty remains with respect to snowfall. The trend in the forecast data is for lower snow amounts. But that could still change.

The first round will be tonight into Saturday, as a transition from rain to a mix and then snow is forecast to occur from north to south across the four state region. Some areas in southern Illinois, southwest Indiana and southeast Missouri could see 1 to locally 2 inches of snow. However, much of this may be confined to grassy, elevated surfaces, as temperatures are forecast to be in the lower to mid 30s. Impacts to travel may be minimal. But a few slick spots cannot be ruled out.

For Saturday night through Sunday, the snow chances shift south. We cannot rule out a couple of inches of snow, and some travel impacts from the Land Between the Lakes area east to Hopkinsville. Meanwhile, for the Purchase area of west Kentucky into the southern

tip of Illinois, west toward Sikeston Missouri, there may not be much in the way of snow accumulation with this storm system. But that could change if the storm track shifts. Continue to monitor the forecast closely today and this evening.

Flood Watch Issued for Stoddard County, MO

DECEMBER 30TH 2021 BY DEE LOFLIN

Flood Watch Issued for Stoddard County, MO

Stoddard County, MO - The national Weather Service in Paducah, KY has issued a Flood Watch for Stoddard County, Missouri.

Description

...FLOOD WATCH IN EFFECT FROM FRIDAY EVENING THROUGH SATURDAY AFTERNOON...

WHAT...Flooding caused by excessive rainfall is possible.

WHERE...Portions of southern Illinois south of Interstate 64, all of southwest Indiana, western Kentucky, and southeast Missouri.

WHEN...From Friday evening through Saturday afternoon.

IMPACTS...Flooding may occur in poor drainage and urban areas. Low-water crossings may be flooded. Tornado debris in the affected areas of western Kentucky could impede drainage.

ADDITIONAL DETAILS... - Widespread rainfall amounts of 2 to 4 inches are expected, with locally higher amounts possible. - <http://www.weather.gov/safety/flood>

PRECAUTIONARY/PREPAREDNESS ACTIONS...

You should monitor later forecasts and be alert for possible Flood Warnings. Those living in areas prone to flooding should be prepared to take action should flooding develop.

More Information

.A slow-moving cold front will be preceded by a surge of tropical moisture, which will result in widespread heavy rainfall and likely some flooding problems.
